DURA LOC™

Like Nothing You've Ever Seen Before

ECOLAB®

Everywhere It Matters.™

DURA LOC™

DuraLoc™ A Revolution in Kitchen Floor Cleaning Tools

To get the job done right, you need the proper tools. That's why Ecolab® brings you a revolutionary new line of long-lasting, interlocking kitchen floor cleaning tools. DuraLoc™ tools and Ecolab floor cleaners work together to give you the ultimate clean in less time.

Challenges: Poor-quality tools deliver poor-quality clean

- Associates don't use broken, dirty tools that are ineffective
- Even the best floor cleaners don't work properly if not applied and deck brushed properly
- Cleaning tools are usually not stored in a neat, orderly fashion

Solutions: The right tools mean superior clean

- Quality tools allow you to get the best from your cleaning products
- The best tools improve the chance your associates will follow correct procedures
- Durable, long-lasting tools lower the overall cost of getting floors clean

One Handle for Every Interlocking Tool

Working with old mops and brooms makes cleaning ineffective. So DuraLoc™ Tools feature a revolutionary interlocking tool head system that allows you to clean floors thoroughly, yet simply and efficiently.

An A-frame universal insert holder locks onto the DuraLoc™ handle, and the amazingly simple interlocking system allows tool heads to be easily switched out.

- Tool heads slide easily and lock securely into place
- Inserts are released with the simple press of a button
- Tool heads can be quickly changed without getting hands dirty
- Only the worn mop, broom and squeegee heads need to be replaced

Eliminate cross-contamination with the right color

DuraLoc™ solves the problem of cross-contamination and zone isolation with five bright color options. Color sleeves lock over the handles to ensure a perfect match to the right set of tool heads. This ensures the tools are used in exactly the right place, keeping your environment free of unnecessary contaminants.

Strength That Lasts

Take a closer look at what makes DuraLoc™ tools so durable. Made with materials that are virtually indestructible, they'll outlast any traditional mops and buckets by years. Built from lightweight aluminum and plastic overmold, they'll stand up to any cleaning challenge you can throw at them. Plus, the DuraLoc™ handle and universal insert holder each come with a 3-year warranty.

So what makes DuraLoc™ so strong?

- The universal insert holder screws onto the handle, creating a two-point connection with wide openings and robust threads
- The arched design of the holder equally distributes stress across the top of the insert adding strength and durability
- The plastic handle overmold adds extra strength and durability to the tool
- A rounded top point on the handle provides ergonomic benefit to the user and snaps easily into the hanging system

THE BIG DIPPER™ is proven to increase deck brushing time by

70%

The Big Dipper™ It's a Better Way to Scrub

The Big Dipper™ is a never-before seen accessory fitted to the deck brush that has been proven to increase deck brushing time by 70%.*

When the deck brush is dunked into the front chemical bucket, the Big Dipper™ fills automatically with cleaning solution. It applies and agitates the floor cleaner in one simple step, helping ensure proper procedures are followed.

- Solution dispenser ensures the correct amount of solution is applied
- Strong polyester bristles scrub out tough spots
- Extra-stiff center bristles make it easier to scrub stains out of grout

The DuraLoc™ Mop Brush takes mopping to a whole new level. It attaches easily to the universal insert holder over the mop. Simply flip the mop over to scrub tough spots.

- Strong polyester bristles target stubborn spots
- Low-profile placement makes it ergonomically effective to flip between mop and brush

See the Big Dipper in action at www.bit.ly/duraloc

*Based on observing times for six different cleaning employees at three restaurant locations washing two different floor areas.

Removable Dump Bucket Means Safer Cleanup

The new DuraLoc™ mop bucket is so innovative it's amazing. Separate compartments keep dirty water isolated from cleaning solution and help reduce contamination for a better clean.

The front compartment holds 17 quarts of cleaning solution and has a curved bottom to accommodate the Big Dipper™.

The rear water bucket is completely removable and can be lifted out and easily emptied, eliminating strains and accidents for a safer cleanup.

Mop wringer is completely removable.

Rear compartment lifts out for easy emptying.

Curved bottom allows easy filling of Big Dipper™.

Handle can be switched for right- and left-handed workers.

Clip keeps tool handle in place to make transport easy.

Hook keeps caution signs within easy reach.

Grease Release Mop

Ecolab mop heads have always had superior grease release action by absorbing and releasing nearly twice as much liquid as regular mops. That's why the DuraLoc mop inserts are made with this proven advanced technology.

… and When You're Done, Just Leave It All Hanging

When the job is done, keep all the tools organized and off the floor with the unique snap-in storage system. The double hangers slide easily onto a 24" storage wall mount that holds handles at different heights. The single handle holder is designed to keep frequently used tools where you need them the most.

- Rounded handle tops snap in and hold in place securely
- Slide-in holders allow for customization of tool organization
- Hanging tools dry faster, which helps eliminate slick spots and mold buildup in storage areas
