

# IMPROVE FINISHED PRODUCT QUALITY ASSURANCE

} A Solution Story

## Synergex™: EPA-registered Sanitizer & Disinfectant

Synergex helped **cheese producer** achieve significant improvement in number of vats passing microbial testing standards and helped reduce product downgrades – leading to an increase in revenue potential.

### CHALLENGES

- > Cheese plant was struggling to **increase percentage of vats passing** microbial testing standards
- > Product re-testing was **impacting productivity, labor** and **warehouse capacity**
- > Downgraded product could result in product **revenue loss**

### SOLUTION

The plant partnered with Ecolab to **trial Synergex for eight weeks** to replace all sanitizing on hard food and environmental contact surfaces.

### RESULTS

**Improved** cheese quality assurance

**Increased** revenue potential

**Increased** productivity

with Synergex  
**74%** improvement  
 of vats passing microbial testing standards\*

### PROGRAM BENEFITS

- Improve finished product quality assurance
- Reduce product downgrades
- Reduce QA testing
- Improve inventory management
- Increase warehouse capacity
- Decrease labor
