

The Tunnel Doctor is in.

We service more tunnels than anyone – and help you get the most from yours.

Your success is our priority. When you need high-performance, cost-effective tunnel solutions, call **Ecolab's Tunnel Doctors**.

We help our customers manage more than 70 percent of the tunnel washers in North America – six times more than any other chemical supplier. That means you can count on us for solutions that integrate effortlessly into your existing system and provide exceptional results.

ECOLAB®
Everywhere It Matters.™

As the industry leader, we offer a comprehensive approach to keep your tunnel washer performing at its peak.

Unparalleled tunnel washer expertise

Our elite team of trained and certified tunnel experts help set up, optimize and troubleshoot your tunnel for maximum performance.

How we do it:

- In-depth training from certified Tunnel Doctor trainers
- Certified training program, led by experts who learn from and collaborate with OEMs and specialists in Europe who know tunnels inside and out
- On-going training and updates with OEMs

Detailed technical testing and diagnostics

Our unique diagnostic toolbox enables our highly trained Tunnel Doctors to perform detailed technical testing and diagnostics for quick and accurate resolution.

How we do it:

- Ultrasonic flow meter to validate water flow
- Temperature loggers to validate temperatures inside tunnel
- pH meter to measure pH throughout the entire wash process
- Process analysis to optimize operational efficiencies

Long-standing partnerships with tunnel washer OEMs

Our extensive network offers deep understanding and ongoing technical support of today's tunnel washing technologies.

How we do it:

- Relationships with every major tunnel washer manufacturer
- Cross training on software upgrades, equipment modifications and improvements
- Collaboration on special projects and innovation
