

Boost Tread Defense™ QF

Dry Non-Food Contact Floor Sanitizer

Boost Tread Defense™ QF is a quat-free, dry non-food contact surface sanitizer specifically designed to improve sanitation where conditions favor microorganism growth and cause sanitation concern.

Boost Tread Defense™ QF helps promote **FOOD SAFETY & SUSTAINABILITY**

- **Enhances Food Safety** – Dry product for use in non-food contact areas of dairy, food, meat, and beverage processing facilities.
- **Prevents cross contamination** - Approved for use as a doorway intervention on floors, in floor mats, and foot pans.
- **Wastewater system** – Ideal for use in facilities with quat wastewater restrictions.
- **Reduced Water Consumption** – Designed for use in low moisture environments or dry processing plants. No pre-dilution necessary.

Boost Tread Defense™ QF is **CONVENIENT** and **EASY TO USE**

- **Easily applied to floors** during production and clings to the surface of footwear and wheels.
- Dyed blue so it is **easily distinguishable from food products and ingredients**.
- **Low dust formulation** permits broadcast application
- Designed as a non-flammable formulation and is **not regulated for transport**

MATERIAL	COMPATIBILITY
