

A photograph of an industrial facility, likely a refinery or chemical plant, at night. The scene is illuminated by various lights, including tall smokestacks and complex piping structures. The lights reflect on a body of water in the foreground. The image is split diagonally by a white line, with the top-left portion being white and the bottom-right portion being blue with a pattern of small white squares.

Manage Enterprise Water Performance

Water Quality Intelligence

Powered by **ECOLAB3D**[™]

Manage Enterprise Water Performance

Visualize water treatment performance on a global scale. Quickly identify underperforming assets. Water Quality Intelligence provides greater visibility and deeper insights to help you optimize asset performance, save water and energy, and lower operating costs.

How It Works

Water Quality Intelligence is an industry-leading solution designed to monitor and optimize your water treatment performance.

ENTERPRISE MAP Connect sites anywhere in the world into a single enterprise view and enable quick identification of underperforming asset

SITE PERFORMANCE Bring together controller, field data, lab data, and customer-defined KPI to deliver greater insights into all asset performance at a site

DATA VISUALIZATION Enable deeper analysis of the real time data and quicker problem solving by using trend charts and benchmarking performance across sites and assets

ACTION LOG Capture your action, recommendation and collaborate to optimize asset performance across all levels of your organization

Partnering with Global Leaders in Technology

In order to deliver secure, intelligent and scalable solutions, ECOLAB3D is built in partnership with:

Microsoft

Real World Value

Designed to bring together and analyze multiple sources of critical data to help:

PROVIDE ENTERPRISE-WIDE VISIBILITY into the performance of your water treatment program at enterprise, site and asset levels

INCREASE ASSET RELIABILITY by enabling deeper analysis of real-time data and trends and delivering greater insights into asset performance

EXTEND ASSET LIFE by enabling faster actions to solve performance issues and optimize water treatment performance

DELIVER WATER, ENERGY, AND COST SAVINGS by quickly identifying what matters the most, leveraging best practices, and turning insight into action in real time

PRIORITIZE VALUE PROJECTS with visibility into savings and impact across your enterprise
